

The Journey of MAKHANA

From Nature to Nourishment

1 HARVESTING

Makhana is harvested from natural ponds with care.

2 SEPARATION

The seeds are separated from the outer shell.

3 SOAKING

Seeds are soaked in water to soften them.

6 READY TO NOURISH

Hygienically packed and ready to bring health and taste to your life.

5 SORTING

Puffed makhana is sorted to ensure the best quality.

4 ROASTING

The seeds are roasted to puff them into light, crunchy makhana.
